EXPERIENCE

Ryu Games, Remote — Software Development Engineer - Contract

September 2021 - May 2022

Ryu Games is a US based gaming oriented platform that provides SDKs which enable Game Developers to transform their games into cash or crypto tournaments.

- **Utilising:** React, Electron-react, styled-components, Node.js, HTML5, CSS3, Git, Blockchain technologies, and GitHub
- **Link:** https://ryu.games/

Acumen Digital, Remote — Frontend Engineer - Full-time

September 2021 - December 2021

Acumen Digital is a multi-disciplinary product design and software development agency, building identities and experiences to elevate and empower organisations.

- **Utilised:** Vue.js, React, CSS3, Git, and GitHub
- **Link:** https://www.acumen.com.ng/

Nigeria Development Foundation, Remote — Frontend Developer, Angular - Full-time

May 2021 - September 2021

NDF is an e-commerce organisation which aims to make it easier for poor to middle-class Nigerians to sell products and provide services by enabling them to do it in a credit system.

- **Utilised:** Angular, Angular material, SCSS, Bootstrap 4, TypeScript, Git, and GitHub
- **Link:** Not gone public.

- WCAG Compliance
- RESTful APIs
- Jest
- Node.js/Express.js
- MongoDB/Mongoose
- DynamoDB

Familiar:
- GraphQL
- Firebase
- Styled-components
- Bootstrap 4

Genesys Tech Hub, Enugu —Frontend Developer - Intern

June 2020 - Feb 2021

As a Frontend Developer with the **Hub**, I:

- Built creative, sleek, completely responsive, and accessible UIs/products using React, HTML5, CSS3, and client-side JavaScript with several software teams in the program.

- Collaborated as one of the two Frontend Developers in an Agile squad to produce Combox, a book app MVP for finding and reading Marvel comic books.

- Increased the above team's involvement by 30% by intentionally onboarding lagging teammates and being actively involved in Scrum sessions.

- Was a Leader on Genesys Tech Hub Leader Sheets'20 for impressive work and clean code with a 70% code efficiency score.

- Prototyped and built **10 useful products/tools** in the 9 months I worked in this role (live links, code, and descriptions can be found on my GitHub.) One of them I am proud to share here is Learnable, pixel-perfect implementation of the Figma design for Genesys Tech Hub's Learnable Program's website built by me using React and CSS3, at this time it only looked good for PC's.

- **Leveraged Knowledge in** Git, HTML5, CSS3, JavaScript/ES6, React, and NodeJS. Performed unit tests using the Jest testing suite.

- Won the Genesys Tech Hub **Nikola Tesla awards** for **'Frontend Developer Student of the Year'**.

SOFTWARE PROJECTS

Personal Website: www.miracleufo.codes built using HTML5, JavaScript, and CSS3 (It's for additional information on my other projects and to find out more about me.)

Also, this is one of my frontend projects I'm proud to share:

Learnable

Learnable is the completely responsive frontend implementation of a website for the Genesys Tech Hub's Learnable internship program.

After the internship I took out time to make it mobile responsive and beautiful (**explore the Learnable tab.**)

- **Utilised:** React, CSS3 (Flexbox, Grid), JavaScript/ES6
- **Link:** https://bit.ly/genesys-learnable

Perfit

Perfit is a full stack (MERN) web app that serves as a platform for freelancers

to post their work profiles (It was designed and implemented by me (both its backend and frontend) in four days.)

- **Utilised:** MongoDB, Mongoose, Express.js, React, CSS
- **Link:** http://perfit-web.herokuapp.com/

EDUCATION

2018 – 2021, Computer Science; **University of Nigeria, Nsukka.**

I'm a Computer Science student of the University of Nigeria, Nsukka, currently with a **4.32/5 CGPA**.

HOBBIES

Sleeping, observing, listening to all kinds of music.

I'm that cool, calm, collected person you want on your team.
